KPA sets aside Sh2.1b for new Shimoni Fishing Port

The Shimoni Fishing Port Project in Kwale County (File).

Kenya Ports Authority Board Chairman Benjamin Tayari says the construction of the long-awaited Shimoni Fishing Port Project was part of the efforts by Government to promote fisheries in the coastal region.

BY **HUSSEIN ABDULLAH AND MARY ALUOCH (KNA)**

Kenya Ports Authority (KPA) has set aside Sh2.1 billion for the construction of the Shimoni Fishing Port Project in Kwale County.

The construction of the port is expected to have a positive impact on trade and economic

growth through large-scale exploitation of the fish industry bolstered by a ready market and value addition which will spur the creation of special economic zones.

KPA Board Chairman Benjamin Tayari said so far Sh2.5 billion has been set aside for the industrial fishing port adding that more funds will be injected in the project as time goes by.

fisheries in the coastal region.

Tayari said so far Sh2.5 billion has been set aside for the industrial fishing port adding that more funds will be injected in the project as time goes by.

He revealed that basic infrastructure development of this new modern fishing port will

KTDA to produce value added orthodox tea for increased revenue

BY **BERNARD MUNYAO (KNA)**

The Kenya Tea Development Agency (KTDA) has launched a programme to support the processing of orthodox tea in all its allied factories countrywide.

The KTDA Chairperson David Ichoho said they will install orthodox tea (pictured) processing machines in thirteen factories in vari-

ous places in the country.

Addressing tea directors in Murang'a, Ichoho noted that the national government has pledged to give Sh800 million to assist in the procurement of the processing machines.

"The money will help us procure eight machines while the agency will buy another five to make a total

of thirteen.

"The machines will help process orthodox tea which has high demand in the international markets and will eventually enable farmers to get more returns," the chairperson said.

Ichoho noted that various varieties of orthodox tea, which include green, white

CONTINUED FROM PAGE 1

be financed using KPA resources entirely.

Mr Tayari said Kenya does not have a dedicated fishing port and that the Shimoni Port, which will have a market hall, cannery, storage facility and a wastewater treatment facility, will be the first in the country.

The KPA Boss said they are investing huge sums of money in port development infrastructure that will boost fishery activities in the Indian Ocean and attract more investors in the value production chain.

Tayari noted that the initial funds will be used for Phase I of the civil-related infrastructure works including buildings, pavement works, roads and storm water construction of

We are ready to give all the support to fast track construction of the Shimoni Port," -Achani

KPA Board of Directors' Chairman Benjamin Tayari receiving the title deed for the Shimoni fishing port project from Kwale Governor Fatuma Achani at her office

the fishing harbor.

Speaking when he paid a courtesy call on Kwale Governor Fatuma Achani, Tayari indicated that the strategic project which is a top priority will spur growth of the blue economy sector.

He said the new fishing harbour will not only act as a growth engine of the coastal region's economy but also boost the livelihoods of thousands of fisherfolk.

"We thank President William Ruto who has given us

priority to fast track construction of Shimoni Port. We already have a contractor on site and we want to ensure the project is undertaken within the set time frame," said Tayari.

He said the construction of a fishing port facility including piers, integrated cold storage and ice block machines will enable local fisherfolk to use the well-equipped fishing port thus increasing the value-added marine products.

During the visit, Governor Achani handed over the title deed for Shimoni Port to the KPA Board Chairman.

She committed to ensure the successful development of the Shimoni Fishing Port spearheaded by KPA, which is expected to be completed within a period of 24 months.

"As a county we are ready to give all the required support to fast track construction of the Shimoni Port," she said.

KTDA to produce value added orthodox tea for increased revenue

CONTINUED FROM PAGE 1

and black tea have a high demand and that KTDA has sourced for a market that requires over two million kilograms annually against a local production of about 500,000 kilos.

Currently, KTDA factories produce a tea variety commonly known as Cutting, Tearing and Curling (CTC) that generates less income as compared to orthodox tea.

"Our plan is to increase our production of orthodox tea because the demand is high and some factories have already procured the machines using their own resources," Ichoho said.

He noted that over 95 per cent of the locally produced tea is exported while only five per cent is consumed locally which, he said, exposes the produce to global market fluctuations.

He cited as examples, the political instability

experienced in countries such as Pakistan and Iran which are some of the biggest consumers of Kenyan tea.

The official further observed that KTDA is eying to tap a wider market in the African continent.

In 2021, Kenya was ranked third among the largest tea producers globally after China and Sri Lanka.

"If we are able to open tariff and non-tariff barriers and approach individual countries diplomatically, we will be able to expand our market," he said.

The Chairperson however decried poor tea production which was attributed to drought experienced in the country since last year.

For the last six months Ichoho said the country produced 542,000 kilos of green leaf as compared to 605,000 kilos that were produced between January and June 2022.

NATIONAL CONSTRUCTION AUTHORITY

NATIONAL OPEN TENDER NOTICE

The National Construction Authority (NCA) is a State Corporation established under the National Construction Authority Act 2011, with the responsibility to oversee the construction industry and coordinate its development. The Authority invites sealed bids from eligible candidates for the following tenders;

Nutrition commodities included in Essential Medicines List 2019

BY JUDY SHERI (PCO)

The Ministry of Health has included nutrition commodities in the Kenya Essential Medical List 2019 which will enable KEMSA procure and stock them and facilitate easy access by county governments.

The inclusion of these is part of the Government's efforts to recognize the importance of lifesaving commodities for Kenyans in pursuit of Universal Health Care (UHC).

The Ministry has also initiated discussions with the National Treasury on sustainable measures for its strategic programmes which are currently funded by development partners.

The announcement was made by the Principal Secretary (PS), State Department for Public Health and Professional Standards, Dr. Josephine Mburu when she received 5000 cartons of Ready to Use Therapeu-

The Principal Secretary, State Department for Public Health and Professional Standards, Dr. Josephine Mburu flags off Ready to Use Therapeutic Foods to 23 drought affected Counties

tic Foods (RTUF) worth Sh 26,389,440 from the World Health Organization (WHO).

The donation, which is enough to treat 10,000 children aged 6 to 59 months with severe malnutrition, will go a long way in complimenting the government's ongoing drought response efforts in food insecure areas.

Dr. Mburu noted that adequate nutrition is ideal for

proper growth and development.

"Nutrition is especially important for child health as it plays a crucial role in growth and development and to ensure optimum child health, it is important for children to consume a balanced diet that includes a variety of nutrient-dense foods", said the PS.

The PS commended the WHO for the gesture and re-affirmed the govern-

The Principal Secretary, State Department for Public Health and Professional Standards, Dr. Josephine Mburu receives Ready to Use Therapeutic Foods to 23 drought affected Counties from World Health Organization (WHO) Country Director Dr. Abdourahman Diallo.

ment's commitment in tackling acute malnutrition especially in the 23 counties currently affected by the on-going drought.

Dr. Mburu disclosed that over the past decade, Kenya has made significant progress in reducing the prevalence of malnutrition among children under five years of age.

"In the recently released KENYA Demographic Health Survey, stunting reduced from 26 per cent in 2014 to 18 per cent in 2022, underweight from 11 per cent in to 10 per cent only, wasting showed marginal

increase from 4 per cent to 5 per cent over the same period due to the prolonged drought situation," she noted. According to the survey, nearly 1.13 million children under 5 were stunted; 315,066 were wasted and 630,132 were underweight in 2022.

The PS added that counties in the Arid and Semi-Arid areas are disproportionately affected by high levels of acute malnutrition often as a result of cyclical droughts that affect food security and livelihoods of the communities. "The Inter-

grated Phase Classification for Acute Malnutrition (IPC AMN) analysis conducted in July 2022 shows the nutrition situation has deteriorated compared to the same season last year with Turkana North, Turkana South and Laisamis slipping into an extremely critical phase where more than 30 per cent of children are acutely malnourished. This translates to about 884,464 children aged 6 to 59 months and 115,725 pregnant or lactating women who require treatment for acute malnutrition," she noted.

"The virus does not move, people move it. We stop moving, the virus dies"

Government to commercialize its robust ICT infrastructure, says PS

BY IRENE GALGALO (PCO)

The government will soon start creating value from its ICT infrastructure by fully commercializing it and allowing other government services and the private sector to benefit from the same.

The Principal Secretary for ICT and the Digital Economy, Eng. John Tanui (Pictured), said the department is focused on promoting the growth of the ICT sector in the country, ensure the protection of personal data in compliance with global standards and to guarantee the digitization of government services.

He was speaking during a live interview with a national television station.

The PS said the process of digitizing government services was underway and that the ICT Ministry has reached

out to all state departments to understand the service they offer to enable the Ministry know how to automate all their functions.

"We are now building our capacity to be able to know how many records and services can be digitalized and automated within the shortest time possible.

"We also want to give opportunities for more players to come and help in digitizing the government. The journey is long but we aim to digitize all citizen-facing services in six months," said the PS.

The State Department has confirmed taking stock of all Government ICT assets, systems and applications that will identify the existing gaps and areas that require interventions and has already developed a report-

ing survey tool to collect the data.

PS Tanui noted that Kenya, and Africa by extension, missed out of the three industrial revolutions that marked the transition of economies but noted that with the ongoing fourth industrial revolution, that is marked with the convergence of technologies and a digital space that defines the future of work, Kenya will take full advantage of the opportunities presented for its youth.

"The plan of the govern-

ment to set up an additional 100,000 kilometers of fiber in the country is to ensure that global opportunities can be accessed from anywhere in the country. Our youthful population can gain employment through IT Enabled Services (ITES) where they can work for a company in another continent. We look forward to not only be consumers of technology, but participate in the development of applications," said Ps Tanui.

Verified information from the State Department of ICT and the Digital Economy indicates that the government plans to rollout universal broadband countrywide in five years by implementing 100,000 km of fibre with 52,000km facilitated by the government and 48,000km by the private sector.

Interested firms may obtain further information from the office of the **General Manager, Supply Chain**, Tel: **(254) (020) 3666230**, Email: **tenders@kengen.co.ke** on normal working days beginning on the date of advert. The tender documents may be collected upon payment of a non-refundable fee of **KShs.1, 000.00** paid in cash or through a banker's cheque at any KenGen finance office.

The document can also be viewed and downloaded from the website **www.kengen.co.ke** and on E-procurement <https://eprocurement.kengen.co.ke:50001/irj/portal>.

Bidders are advised to refer to the website and on e-procurement regularly for any additional information /clarifications/addenda. Downloaded copies are FREE.

SUBMISSION OF TENDERS:

1. Tender documents must be submitted online through KenGen E-Procurement web portal found on the KenGen website (www.kengen.co.ke)
2. Bidders who are interested in this tender **MUST** ensure that they are registered in the E-Procurement Portal. Please ensure compliance to the following;
 - For suppliers registering for the first time ensure the **"Public Procurement"** checkbox is ticked so that the login details are sent to suppliers automatically.
 - All documents Must be uploaded to the SRM System through the <https://eprocurement.kengen.co.ke:50001/irj/portal> found at www.kengen.co.ke
 - Prices to be entered under item of the RFx shall be similar to be prices in the price schedule.

Note: Bidder who have submitted their bids and wish to amend them further should not click on **WITHDRAW** but click on **EDIT** to enable them amend their bid response and make appropriate changes.

Bidders who require any form of assistance on how to bid via the system are advised to download a manual from the website or may contact eprocurement@kengen.co.ke

Tender Original Security where applicable in the form and amount specified and must be delivered in plain sealed envelope clearly labelled with the **tender number** and **tender description** before the closing date to the following address:

**General Manager- Supply Chain,
Kenya Electricity Generating Company PLC,
9th Floor, KenGen Pension Plaza II,
Kolobu Road, Parklands,
P.O. Box 47936, 00100 NAIROBI**

Tenders will be opened **online** soon after the closing time in the presence of the candidates' representatives who choose to attend at KenGen Pension Plaza II, Tender opening room, 6th floor.

UNICEF donates life saving supplies to tackle cholera outbreaks in counties

BY MYGOV REPORTER

The government has dispatched four trucks of assorted health, water, sanitation and hygiene supplies to counties to help contain cholera outbreaks so far recorded in more than 6 counties countrywide.

The supplies donated by the UNICEF, Germany Em-

bassy and other partners is aimed at mitigating the severe effects of drought that has affected 23 counties and left more than 600,000 children with severe malnutrition. "I want to take this opportunity to recognize the invaluable contribution made by our friends like the people of the Republic of Germany, and part-

ners like UNICEF, who have chosen to walk the journey with us without relenting," said Cabinet Secretary for Health, Dr. Susan Nakhumicha Wafula while flagging off the trucks.

Over the last 14 weeks, the Ministry of Health has been making continuous efforts to contain a Cholera outbreak, which has now

affected up to 14 counties across the country. The CS disclosed that through the contribution of numerous friends and partners, the government has significantly benefitted from capacity building in key areas of emergency response.

"The response process owes a big proportion of its

success to the robust partnerships the ministry has enjoyed, including technical assistance in the area of training, strategic deployment of medical countermeasures such as vaccines and other commodities, quick diagnosis and confirmation of suspected cases and many other forms of support that partners have provided," said the CS. Besides Cholera outbreak, the CS noted that the Ministry has continued to experience other public health threats

such as the just contained Ebola Virus Disease (EVD) outbreak in Uganda, that has called for energies to be focused on effective surveillance and preparedness for any eventualities.

The CS thanked the Ebola Virus Disease Preparedness teams, and partners such as UNICEF and the Republic of Germany for ensuring that heightened surveillance was maintained throughout a period when the country was at a high risk of experiencing an outbreak.

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED NDARUGO II DAM WATER SUPPLY PROJECT AONG NDARUGO RIVER WITHIN THENGE-INI AREA, OFF THENGE-INI ROAD IN KIAMBU COUNTY.

Pursuant to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Athi Water Works Development Agency, proposes to construct a dam (with a crest elevation of 1800.00 m, a crest width of 8m, a maximum dam height of about 52m, a total crest length of 300m, a controlled drainage area of 67 Km², an effective storage capacity of 16.249 million m³, an average annual water supply of 16.62 million m³, spillway, water intake, bottom outlet & associated facilities), water supply pipeline(diversion pipeline, transmission pipeline, reservoir & associated facilities) and a water treatment plant with a capacity of 50,000 m³/d along River Ndarugo within Thenge ini area in Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental/ Social Impact	Proposed Mitigation Measures
Conflicts arising due to loss of land, developments e.g., houses and crops	<ul style="list-style-type: none"> Compensation of affected persons Informing all community members along the pipeline routes of the proposed project. Incorporating community input Creation of a community liaison office.
Loss of vegetation	<ul style="list-style-type: none"> Retention of vegetation where possible. Care will be taken to minimize damage of vegetation cover along the pipeline route
Soil erosion	<ul style="list-style-type: none"> Loss soils to be used to fill back excavated/disturbed areas Loss soils to be compacted with a mechanical roller to avoid erosion by wind or water
Increased generation of waste	<ul style="list-style-type: none"> Dispose waste at licensed waste treatment sites through licensed waste handlers Adhere to waste management regulations of 2006
Road traffic disruption	<ul style="list-style-type: none"> Observe good driving practice to be followed Suitable junctions/access points to be provided Use of appropriate and legible signage Employment of formal flagmen/women to ensure public safety
Impacts on cultural, religious and sensitive sites	<ul style="list-style-type: none"> Mapping of cultural, religious and sensitive sites rerouting the sites to less sensitive sites Consulting the local elders and compensation for any damages caused
Air quality concerns	<ul style="list-style-type: none"> Limit levels of dust through good practices such as watering of access roads, construction sites, deviations and other disturbed sites and cover lorries transporting construction materials Provide workers with dust appropriate dust protective gear including masks and overalls Regular servicing of vehicles
Noise and vibrations	<ul style="list-style-type: none"> Standard restrictions to hours of site works (8:00AM-5:00PM) and the lifting of mufflers on construction equipment Use of protective hearing devices such as ear plugs and ear muffs among workers when noise levels exceed 85-90dBA
Health and Safety risks	<ul style="list-style-type: none"> Design and implement safety measures and emergency plans to contain accidents risks Install appropriate road traffic signs, markings and road furniture Provide workers with protective clothing (nose and mouth masks, earmuffs, overalls, industrial boots and gloves) and helmets

Environmental/ Social Impact	Proposed Mitigation Measures
Hydrology	<ul style="list-style-type: none"> At least 30% of the base flow should always flow into the stream to sustain ecological and social requirements downstream Monitor the effects of the dam to the river basin over time
Water loss	<ul style="list-style-type: none"> Geological profiles proposed for inundation should be established to identify areas of weakness and appropriate strengthening measures incorporated Sub-surface water infiltration trends on affected areas should be established and monitored over a period with respect to effects on houses and other structures Plant indigenous trees and shrubs around the dam buffer zone to minimize loss of water through evapotranspiration processes
Increased waste water production	<ul style="list-style-type: none"> Ensure that all households, institutions and businesses connected to the new water pipeline network are connected to the proposed new municipal sewer line The waste water should be treated before being disposed
Climate change impacts	<ul style="list-style-type: none"> Integrate climate change impacts such as extreme heat and flooding into the project's design Workers be provided with adequate facilities and PPEs for comfort in case of extreme heat The premises should be constructed with adequate drainage systems to control flooding The proponent is advised to construct premises and facilities that can withstand earthquakes (seek further advise from the state department of geology)

The full report of the proposed project is available for inspection during working hours at:

Multi-billion gravity fed project in Tana River to be ready in April

BY SADIK HASSAN (KNA)

The Bura Irrigation and Settlement Scheme Rehabilitation Project which will convert the Bura Irrigation Scheme from a pumped system to a gravity-fed system will be complete by April this year.

To achieve the completion timelines, the National Irrigation Authority (NIA) has placed the Sh7 billion Food Security Project, which has

taken 10 years since its inception, under the 100 days Rapid Result Initiative (RRI).

The NIA Chief Operations Officer Joel Tanui revealed that the contractor is at 90 per cent in terms of work done in the system, assuring that in the next three months the project will be complete.

"It is one of the programmes that we have put under RRI. We have been able to address the chal-

lenges that the projects had in terms of contractual arrangements with the contractor who is on-site. We have agreed that by April the contractor should be able to hand over the project so that it can benefit the Bura Irrigation farmers," said Tanui.

Speaking during a field visit to Tana Irrigation Scheme, Tanui said the project involves the rehabilitation of irrigation works, provision of equipment, ex-

The Bura Irrigation and Settlement Scheme Rehabilitation Project

tension, and credit to allow reliable irrigation of an extra 15,000 acres. The area under irrigation will increase to 25,000 acres from the current 12,000 acres.

The gravity project will ensure the availability of irrigation water by abstraction of 11 cubic meters per second of irrigation water throughout the year as opposed to the current 2.7 cubic meters per second through pumping.

KFCB to review licence fees to attract youth into creative arts

BY MUTISO MBITHI
(MYGOV)

Film regulator, Kenya Film Classification Board (KFCB) is reviewing all the applicable licence fees across all market segments of the film sector in order to encourage young people to venture into the creative economy.

The Board will also encourage more "Video on Demand and Over the Top" commercial audio-visual platform operators to venture into the local market and open up new opportunities to monetize film and video content generated by the youth. This is by working with the parent Ministry of ICT and the Digital Economy to introduce a self-regulatory framework for the

creative artists. KFCB Acting Chief Executive Officer, Mr. Christopher Wambua said this new self-regulatory framework will promote the ease of doing business in the film sector by ensuring that broadcasters and commercial online streaming service platforms self-classify content instead of submitting it to the regulator. Wambua who was speaking during the Covid-19 and Digital Employability Graduation Ceremony at the AFRALTI Centre in Nairobi said the framework is in tandem with the Ministry of Information, Communication and the Digital Economy's strategic objective of ensuring creatives earn from the talent, dubbed 'Talanta Hela'.

ECD centers in Samburu County receive food

BY Robert Githu and Petikas Lelendu (KNA)

The Samburu County government has distributed food worth Sh. 44.6 million to 540 Early Childhood Education (ECD) centers.

Speaking after flagging off the consignment outside his office in Maralal town, Samburu County Governor, Lati Lelelit, said that 212 tons of rice, 40 tons of beans, 11 tons of cooking oil and 7 tons of salt will be distributed to all ECD centers in the 15

Wards.

Lelelit added that the food will help keep 43,846 children in school up to the end of first term, especially during the ongoing drought that has continued to hit the region.

"Samburu is facing the worst drought in over 50 years due to the ripple effect of climate change and purchase of such food items for our ECD is part of our drought mitigation strategies," he said.

MINISTRY OF MINING, BLUE ECONOMY AND MARITIME AFFAIRS

STATE DEPARTMENT FOR BLUE ECONOMY AND FISHERIES

INVITATION TO TENDER

The Government of the Republic of Kenya has obtained financing through a loan (Tied Aid Credit) from the Hungarian Government, financed by the Hungarian Exim Bank, for Design, Build, Equip, Commission and Training of Kabonyo Fisheries and Aquaculture Service and Training Centre of Excellence.

PROCURING ENTITY:	STATE DEPARTMENT FOR BLUE ECONOMY AND FISHERIES				
CONTRACT NAME AND DESCRIPTION:	PROPOSED CONSTRUCTION OF KABONYO FISHERIES AND AQUACULTURE SERVICE AND TRAINING CENTER OF EXCELLENCE (KFASTCE).				

No.	Tender Reference No.	Description	Brief Scope	Pre-Tender Site Visit Date & Time	Tender Opening	Address for Submission of Tenders	Physical Address for Hand Courier Delivery	Address for Opening of Tender	Eligibility
1.	MMBE&MA/SDB E&F/8/2022-2023	Proposed Construction of Kabonyo Fisheries and Aquaculture Service and Training Center of Excellence (KFASTCE)	Design, Build, Equip, Install, Commission and Train-	7 th February, 2023 1200 Hrs (EAT)	2 nd March 2023	State Department For Blue Economy and Fisheries, P O Box 58187 - 00200, Nairobi Kenya	Nairobi City, Ngong Road, Maji House, 3 rd Floor, Room 343	Blue Economy And Fisheries Nairobi City, Ngong Road, Maji House, 6 th Floor Boardroom	Firms Registered in Hungary. In case of JV The Lead Firm must be registered in Hungary

Interested eligible bidders may obtain further information from Principal Secretary, State Department for Blue Economy and Fisheries via email; ps@blueeconomy.go.ke

The State Department for Blue Economy and Fisheries, now invites eligible Hungarian Firms or its joint ventures or consortia to submit their sealed bids in order to Design, Build, Equip, Install, Train and Commission the project in accordance with the bidding documents.

Tendering will be conducted under open competitive method (International) using a standardized tender document. Tender is open to all qualified and Interested Tenderers from Hungary.

Qualified and interested tenderers may obtain further information and inspect the Tender Documents during office hours (0800 to 1600 hours) at the address given below.

The bidding documents shall be available in the State Portal for tenders www.tenders.go.ke; and Ministry's Website www.mibema.go.ke; Interested eligible Hungarian entrepreneurs may download bidding documents from the websites.

The Tenderer shall prepare ONE original of documents comprising the Tender (clearly marked **ORIGINAL**) and TWO (2) copies of documents comprising the Tender (clearly marked **COPY**) and Soft Copy.

The Goods and Services included under the scope of the Project must comply with the requirements of origin established in the Bidding Documents.

All Bids must be accompanied by a Bid Security, denominated in US Dollar (USD), duly issued by a bank of renowned international repute in the sum of **USD 10,000** valid for a time period of **One Hundred and Eighty Two (182) days** from the date of bid opening.

It will be allowed, after being registered as a single company, to Bid in a Joint Venture or Consortium with other registered or non-registered Bidders. In this case, before the deadline for obtaining the Bidding Documents, the Bidders must communicate to the Contracting Authority and the Hungarian Government to participate in the Bid as a member of a Joint Venture or Consortium by submitting a Letter of Registration and a Letter of Appointment of Joint Venture or Consortium. A Bidder participating on its own or as a member of a Joint Venture or Consortium shall not be allowed to participate in more than one Bid.

The Tenderer shall chronologically serialize all pages of the tender documents submitted.

Completed tenders must be delivered to the address below on or before **2nd March, 2023 at 10.00 am East African time**

Bids in Plain sealed envelopes, marked with the tender number and corresponding description to be sent or deposited in the tender box provided at Maji House, 3rd Floor to be received on or before **2nd March, 2023 at 1000hrs (East African Time)**. Late tenders will be rejected.

Addressed and Sent to;

Principal Secretary
State Department for Blue Economy and Fisheries
P O Box 58187 – 00200
NAIROBI - KENYA

Bids will be opened on **2nd March, 2023 at 1000hrs (East African Time)** in the presence of duly authorized representatives of Bidders wishing to attend and a representative of the Hungarian Embassy in Kenya. The opening date for the tenders will be notified to the Hungarian Embassy in Kenya.

PRINCIPAL SECRETARY

"The virus does not move, people move it. We stop moving, the virus dies"

Nakuru County adopts new technologies to curb water wastage

BY ESTHER MWANGI AND CHARLOTH CHEPKEMOI (KNA)

The County Government of Nakuru has invested in new technologies including new modern pipelines and advanced metering (Smart meters) to reduce non-revenue water generated from its three Water Service Providers (WSPs).

This is aimed at reducing

water wastage and enhance the economic sustainability and viability of water utilities in the County. Non-Revenue Water (NRW) refers to water lost through illegal connections, inefficient or rundown supply infrastructure and malfunctioning meters. Water Services and Regulatory Board (WASREB) defines levels of Non-Revenue Water of under 20 percent as good, 20-25 as

acceptable and over 25 per cent as not acceptable.

County Executive in charge of Water, Environment, Energy, Natural Resources and Climate Change, Dr Nelson Maara regretted that the country was losing about 430,000 cubic metres of water, equivalent to Sh12.2 billion, per year due to unnecessary wastages and said the County government intended to reduce the

Non-Revenue water levels from an average of 54 per cent to 20 per cent which will help fix inefficiencies in water supply systems and save a huge portion of public finance.

Dr. Maara said a Non-

Revenue Water (NRW) audit revealed that the three Water Service Providers lose more than half of their treated drinking water to leaks, theft and meter inaccuracies, resulting in monthly losses of over Sh 40 million and resulting to scarcity of the commodity.

He however said plans were underway to rehabilitate and upgrade old wastewater treatment, water

supply and sewerage systems managed by the three water providers including Nakuru Water and Sanitation Services Company Ltd (Nawasco), Nakuru Rural Water and Sanitation Company Limited (Narwasco) and Naivasha Water, Sewerage and Sanitation Company Ltd (Naivawasco), a move he said, was aimed at ensuring safe and adequate water supply.

PREVENTION

JANUARY 31, 2023

ADVERTS | 9

PRINTED BY : THE STANDARD

Gov't recommits to respect media freedom, calls for self -regulation

BY JOSEPH NG'ANG'A

The government has reiterated its commitment to nurturing an environment that secures a free and independent self-regulating Media.

Ministry of Information, Communication and the Digital Economy Cabinet Secretary (CS) Eliud Owalo

said the State and Media play a complimentary role and the success of the media is the success of the government since the government has an agenda which needs to be communicated to the people.

Speaking when he inaugurated the Selection Panel for the Board of the Media

Council of Kenya (MCK), Owalo explained that the MCK is an entity of the Media and it should be as impartial to ensure that the media is self-regulated without interference from any quota, including the government.

He explained that the Media Council Act of 2013

CS Information, Communication and the Digital Economy Eliud Owalo (Right) and the State Department for Broadcasting and Telecommunications PS Prof Edward Kisiang'ani when they unveiled the selection panel.

PHOTO: ERICK BOSIRE.

established the MCK as an independent national institution, mandated to set self-regulatory compliance

standards for the media, and arbitration mechanisms for other entities and the public, relative to their use of the media.

Members of the selection panel include Director of Information Ms. Josephine Kinuthia who is representing the Kenya News Agency (KNA), Kenya Union of Journalists (Mr. Oscar Obonyo), Media Owners Association (Mr. Emmanuel Juma), Kenya Editors Guild (Mr. Macharia Githio) among others.

COMMISSION FOR UNIVERSITY EDUCATION

QUALITY, OUR AGENDA

REDHILL ROAD, OFF LIMURU ROAD, GIGIRI
P.O. Box 54999-00200, Tel: + 254 (02) 7205000; 0726-445566 and 0717-445566; 0780-656575

DIRECTOR GENERAL

COMMUNICATIONS AUTHORITY OF KENYA

PUBLIC CONSULTATION AMATEUR RADIO LICENSING GUIDELINES

The Communications Authority of Kenya (CA) is the regulatory authority for the ICT industry in Kenya, with responsibilities in telecommunications, cyber security, e-commerce, broadcasting and postal/courier services. The CA is also responsible for managing the country's numbering and frequency spectrum resources, administering the Universal Service Fund as well as safeguarding the interests of users of ICT services.

The Authority regularly establishes and reviews new sector regulations, guidelines and policies. This is informed by the rapidly changing ICT sector and the emerging technologies that present tremendous opportunities and regulatory challenges that may require a new approach.

It is against this backdrop that the Authority is reviewing the current Amateur Radio Licensing Guidelines with the aim of adopting a progressive licensing regime that will allow existing amateurs to expand their practice and lower barriers of entry for aspiring amateurs among other benefits.

The Authority invites comments from all stakeholders on the proposed guidelines available on the Authority's website at: <https://www.ca.go.ke/consumers/public-consultations/open-consultations/>.

The objective of this consultation process is to give stakeholders an opportunity to comment on the Amateur Radio Licensing Guidelines before adoption.

The comments or memoranda should be sent to the email address: spectrum@ca.go.ke or the official address below before the close of day on **21st February 2023**.

THE NATIONAL TREASURY AND ECONOMIC PLANNING

FINANCING LOCALLY – LED CLIMATE ACTION PROGRAM PROGRAM IMPLEMENTATION UNIT

JOB OPPORTUNITIES

CREDIT NO: IDA 6980; TF B6810 – KE (P173065)

The Government of Kenya (GoK) through the National Treasury and Economic Planning has received financing from the World Bank towards the cost of the **Financing Locally Led Climate Action (FLLoCA) Program**. The Program Development Objective is to deliver locally-led climate resilience actions and strengthen county and national governments' capacity to manage climate risks. The FLLoCA Program is being implemented by the National Treasury through the Program Implementation Unit (PIU). The FLLoCA Program focuses on capitalizing the National and County Climate Change Funds; building county level capacity for planning, budgeting, reporting and implementation of local climate actions in partnership with communities; and strengthening of national level capacity for coordination, monitoring and reporting. The program is being implemented by the National Government in collaboration with County Governments. The PIU is looking for highly motivated individuals to fill the positions of **Program Manager -County Coordination, Monitoring & Evaluation Specialist and Support Staff to be engaged on contract** for a period of 3 (Three) years subject to work requirements and satisfactory performance over the life of the Program. The contracts are anticipated to commence on 1st March, 2023.

1. PROGRAM MANAGER-COUNTY COORDINATION Ref: FLLoCA/PIU/PMCG 2022-23 - 1 Post

1.1 OBJECTIVES OF THE ASSIGNMENT

The main objective of the assignment is to provide programme support to the Program Coordinator in the implementation of the FLLoCA Program. The Program Manager –County Coordination consults with the Program Coordinator on all the day to day as well as long term administrative and budgetary decisions regarding program implementation and the overall management of the PIU and program activities.

1.2 TASKS TO BE PERFORMED

Assist the Program Coordinator in ensuring overall coordination of the program and the timely execution of the procurement and work plan.

Assist the Program Coordinator in establishing effective coordination between and proactive participation of Program Beneficiaries and for maintaining direct coordination and supervision relationships between the PIU, the Government, and consultants regarding the implementation of the Program's work program.

- Coordinate and supervise administrative, technical and communication activities necessary for the successful program preparation and implementation.
- Coordinate and work with the Program Coordinator in the preparation of progress and financial reports for submission to the World Bank and the Government.
- Assist the Program Coordinator in monitoring the performance of the program component.
- Assist in coordinating and participate in meetings with beneficiary agencies, government officials, development partners and stakeholders to articulate and disseminate the Program objectives and implementation progress.
- Assist in coordinating the training activities for the PIU staff and the beneficiary agencies.
- Contribute to the preparation of Terms of Reference, Requests for Proposals and contract documents for technical assistance to beneficiary agencies and the preparation of technical specifications for the procurement of goods and services.
- Provide support in the technical assessment of bids for the provision of services and supply of equipment and evaluation of proposals for consultancy services for the beneficiary agencies.
- Work closely with the line Program Managers, Procurement Specialist, M & E Specialist, Communications Specialist and other departmental staff for the timely execution of contracts.
- Be responsible for contract management for consulting services and the purchase of goods and equipment; ensure the timely execution of contracts for consulting services and the purchase of goods and equipment and monitor timely delivery of contractual obligations by consultants and suppliers. In the case of contracts for consultancy services, monitor the timely delivery of reports, timely review and approval of reports by the beneficiary agencies and review and approval of invoices for payment.
- Participate in the monitoring and evaluation activities of the Program and work closely with beneficiary agencies in reviewing the Program monitoring and evaluation framework for monitoring results in achieving program objectives.
- Contribute to the preparation of presentation materials, newsletters and website contents for communication of Program objectives and implementation progress.
- Perform any other duties assigned by the Program Coordinator or designate.

1.3 PROFILE OF PROGRAM MANAGER- COUNTY COORDINATION

Qualifications, Skills and Experience

- A minimum of a Master's degree in Environmental Studies, Business Administration, Finance or Economics.
- A minimum of 3 years' relevant experience in Government organizations, parastatals and/or donor – funded projects/programs.
- Experience in international projects/programs, especially those financed by the World Bank
- Good understanding of Climate Change and Green Economy initiatives and devolved Government system.
- Good understanding of Locally – Led Climate Change initiatives and community driven development.
- Excellent analytical, report writing skills and must be computer literate.
- Capacity to work under pressure and meet tight schedules under minimum supervision.
- Excellent communication and interpersonal skills and able to work in a team.

1.4 REPORTING MECHANISM

The Program Manager-County Coordination will report to the Program Coordinator for day-to-day activities and shall be engaged on full time basis.

2 MONITORING AND EVALUATION SPECIALIST

Ref: FLLoCA/PIU/ME/2022-23 - 1 Post

2.1 OBJECTIVES OF THE ASSIGNMENT

The objective of this assignment is to establish the Monitoring & Evaluation (M&E) function in the PIU and develop the M&E System for the FLLoCA Program. This will be undertaken through the joint development of a shared M&E system among key stakeholders which will be supported by facilitating stakeholders to undertake their own M&E activities and to link these into an overall assessment of program progress and needed actions. The objectives of the program M&E system will be to: i) regularly monitor program implementation, ii) take corrective action when program performance is off track, and iii) periodically evaluate program performance to influence program plans and budgets. The M&E Specialist will thus guide the overall strategy formulation and implementation of the M&E function and system and provide timely and relevant information/ report to program's stakeholders including the World Bank.

2.2 TASKS TO BE PERFORMED

The M&E Specialist detailed tasks will include but not limited to the following:

- Lead in the implementation of the developed Program M&E system, including the M&E data collection and reporting plan and institutional framework and systems;
- Operationalize the M&E unit and its required operational structures in the PIU;
- Finalize the Program M&E Manual, including defining its objectives, detailed design of data collection, analysis, and reporting plan for each indicator, M&E implementation arrangements, roles and responsibilities, work plan and a budget;
- Liaise with primary Ministries, Departments & Agencies (MDAs), Counties and Private Sector stakeholders and other staff to ensure a two-way flow of information on Program implementation and performance;
- Ensure that an effective and participatory M&E system and methodology are established consistent with a robust M&E function;
- Supervise implementations of approved M&E work plans during implementation, and if required, update and amend the M&E process following ongoing consultation with stakeholders, partners, and beneficiaries;
- Generate and assess information required for monitoring and reporting on key operational and performance indicators and outcome objectives established for the program as detailed in approved work plans and results framework;
- Promote accountability by drawing on information on efficiency and effectiveness to assess and communicate whether program activities are likely to achieve expected results and / or realize its objectives;
- Carry out routine Program performance reviews – organized by the M&E Specialist under the supervision of the overall Program Coordinator - identifying and promoting the corrective actions necessary from time to time to improve implementation;
- Prepare and implement an approved evaluation plan to ensure effective assessment of intermediate and program outcome evaluation;
- Oversee the preparation of quarterly progress reports, mid-term evaluation report, annual report and end-of-program evaluation report;
- Develop simple reporting formats to be used in collecting data by the MDAs, Counties and Communities for program which will be compatible with the available Management Information System software;
- Develop and maintain partnerships with implementing MDAs, Counties and Communities to assist in the monitoring and evaluation of program;
- Undertake regular visits to the field to support implementation of M&E and identify where adaptations might be needed;
- Conduct in-house M&E training for PIU staff & other key MDAs and Counties;
- Any other duties assigned by the Program Coordinator.

2.3 CONDUCT OF WORK

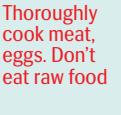

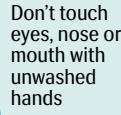

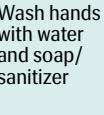

The M&E Specialist will coordinate with program implementing MDAs, Counties and Program Champions / Focal Points to ensure coherent and standard M&E data gathering and reporting system are in line with the Program Development Objective (PDO) and Key Performance Indicators (KPI) established for the program.

The M&E Specialist will also establish close and cooperative working relationships with the World Bank M&E Specialist team based in the Country Office in Nairobi and the National Treasury's External Resources Department.

2.4 PROFILE OF MONITORING & EVALUATION SPECIALIST

Qualifications, Skills and Experience

- A minimum of a Master's Degree in Monitoring and Evaluation, Economics, Statistics, Project Management or Social Sciences. Relevant professional qualifications will be an added advantage;
- A minimum of 8 years' experience in the public service and donor funded program, three years must have served in Program Management, Monitoring and Evaluation.
- Demonstrable understanding of program M&E systems, including understanding various types of data for monitoring, systems for monitoring program progress, performance reviews, integration of management information systems in M&E and program management, and various approaches to program evaluations;
- Excellent analytical report writing skills and must be fully computer literate;
- Ability to manage integrated M&E function with community driven development;
- Capacity to work under pressure and meet tight schedules under minimum supervision;
- Excellent communication and interpersonal skills and able to work in a team.

THE NATIONAL TREASURY AND ECONOMIC PLANNING

2.5 REPORTING MECHANISM

The M&E Specialist will enter into a contract with the National Treasury and Economic Planning-Kenya and will report to the Program Coordinator for day-to-day activities.

3 OFFICE ASSISTANT

Reporting to: Senior Administrator – Program Implementation Unit

Objective: The Office Assistant is expected to perform support functions which contribute to the effective and efficient operations of the PIU

Deadline for submission of applications is **21st February, 2023** at **1630hrs East African Time**.

PROGRAM COORDINATOR
FOR: PRINCIPAL SECRETARY/NATIONAL TREASURY

Migori farmers turn to soil management experts as harvests decline over time

BY GEORGE AGIMBA (KNA)

Farmers in Migori County are turning to soil management to increase their crop harvests that have been declining fast in consecutive seasons.

They have embraced crop rotation techniques to maintain soil fertility in their farms.

"Year in and year out, we have ploughed the same land like our forefathers. Farmers have also used the same fertilisers and pesticides on the same land for years with the end result being tired soils," said a farmer, Mr. Charles Mwita from Ntimaru, Kuria East Sub-County.

He cited decreasing soil quality as a major cause for decreased land productivity within the county. For instance, in 1977, an acre of land in the region would produce over 60 bags of maize, he said.

"The soils were very productive then. But the same cannot be said today as the same acre now yields below 20 bags," he explained.

A farmer inspects his Tobacco crop in Migori where crop harvests have been declining fast due to soil infertility.

His sentiments were echoed by Mr. Pius Onyango, a farmer, and chairman of Ulunja Farmers Group in West Kanyamkago Location in Uriri Sub-County.

"We have been planting and top-dressing fertilisers and herbicides for a long time. This has exerted stress on the soils," he said.

But with the help of experts, they are turning their fortunes around. Mr. Thomas Owiti, an agricultural expert who retired from the civil service recently said years of cultivating the same crops on the same land had resulted in poor soils and low yields.

"Farmers have tilled the same crops on the same land for years with the end result being tired soils," he said, adding that it is time that they took a paradigm shift and start rotating different crops on their farms to save soil fertility and get good yields.

Rising inflation, he explained, has triggered a serious spike in the costs of fertiliser, land leasing, fuel, labour, pesticide and subsequently eroding earnings of local farmers drastically, a situation that has made it difficult for the farmers to secure food security.

TENDER NOTICE

The Engineers Board of Kenya invites interested and eligible bidders to submit sealed bids for the following:

No	Tender Reference No	Description of Tender	Eligibility	Tender Closing Date & Time
1	EBK/RFP/05/2022-2023	Provision of Consultancy Services in the Development of (2023/2024 - 2027/2028) Strategic Plan for Engineers Board of Kenya.	Open	28th February, 2023 at 12.00 noon.

THE NATIONAL TREASURY AND ECONOMIC PLANNING

PUBLIC NOTICE

REQUEST FOR COMMENTS ON KENYA'S ACCESSION TO THE AGREEMENT ON THE ESTABLISHMENT OF THE GLOBAL GREEN GROWTH INSTITUTE (GGGI)

The Government of Kenya wishes to accede to the Agreement on the Establishment of the Global Green Growth Institute (GGGI). The GGGI, established in 2012, is a treaty-based international, inter-governmental organization whose vision is a low-carbon, resilient world of inclusive and sustainable growth by supporting members in the transformation of their economies to a green growth economic model.

The National Treasury that is spearheading the process on behalf of the Government of Kenya established an Inter-Agency Committee to make recommendations on Kenya's accession to the Agreement on the Establishment of the GGGI. The Committee has since developed a report on the rationale for Kenya's accession to the GGGI.

As part of the process of engaging the public and stakeholders on this important Agreement, we have prepared the report on the rationale for Kenya's accession to the GGGI, which is available at the National Treasury website (<https://www.treasury.go.ke>). The purpose of this Public Notice is to invite general and specific comments on Kenya's accession to the GGGI. The comments should be forwarded through the email [climatefinance@treasury.go.ke] by **Friday 10th February 2023**.

WATER ACT 2016

Section 139

PUBLIC NOTICE TO ALL WATER SERVICE PROVIDERS

Regulation of Water Vendors

The Water Services Regulatory Board (**WASREB**) is the National Regulator for water and sanitation services, having been established under section 70 of the Water Act 2016, with the principal object of protecting the interests and rights of consumers in the provision of water services, while ensuring other stakeholders' interests are also safeguarded.

Pursuant to her statutory mandate under section 72 of the Water Act 2016, WASREB sets, monitors and reviews rules and regulations to ensure water services provision is affordable, efficient, effective and equitable.

Section 85(1) of the Water Act 2016 provides that a person shall not provide water services unless under the authority of a license issued by **WASREB**. Further, the Regulations to the Water Act 2016; Water Services Regulations 2021, stipulates that all licensed water service providers should regulate water vending systems within their areas of supply. The regulation should be as per the specific rules for various vending systems to be adhered to by all water vendors contained in **Water Vending Guideline** developed by WASREB, (available at www.wasreb.go.ke: <https://bit.ly/3kz8am7>).

Pursuant to the foregoing provisions, notice is hereby given to all Water Service Providers to ensure that all water vendors within their area of supply;

- (a) acquire a permit from the Water Service Provider,
- (b) source water for vending only from approved sources,
- (c) charge rates approved by the Water Services Provider, which are compliant with guidelines issued by the Regulatory Board,
- (d) operate vending kiosks or water tankers at approved locations,
- (e) submit vendors health certificates - vendors handling the water should be regularly checked for any communicable disease by public health units to ensure no pathogenic contamination takes place,
- (f) file annual reports according to a reporting format approved by the Water Services Provider.

This notice applies to the following categories of water vending systems:

- i. Water kiosks
- ii. Water tankers
- iii. Hand or donkey drawn carts
- iv. Water points (shallow wells and springs)
- v. Private boreholes

This public notice is issued by WASREB:

- To ensure uniformity of standards in the provision of rights, as envisaged by Articles 21 and 191 of the Constitution of Kenya 2010
- In the interest of ensuring that water service standards are adhered to in terms of quality, cost and customer service
- To safeguard the health and safety of consumers.

All Water Service Providers are thus advised to commence the registration process immediately and comply with this notice by **28th February 2023**.

"The virus does not move, people move it. We stop moving, the virus dies"

State, World Bank to launch projects geared towards boosting incomes of fishermen

BY FATUMA SAID (KNA)

The Government in partnership with the World Bank and the International Fund for Agricultural Development (IFAD) will establish projects designed to improve and increase the incomes of poor households involved in the aquaculture sector.

This policy resonates with a commitment made by the government to provide cooling storage systems, transform Beach Management Units (BMUs) into SACCOs and Cooperatives and construction of landing sites to ease fishermen's management and access funding from financial in-

stitutions.

Speaking during a consultative meeting between the Blue Economy Committee of the Council of Governors and Development Partners in the sector held at a Mombasa hotel,

We want to ensure the resources we are receiving are utilized to achieve the socio-eco-economic wellbeing of the citizens”
-Otuoma

Busia Governor Dr. Paul Otuoma said the meeting's goal is to align the sector's objectives to ensure teamwork towards achieving value addition in the blue economy sector.

"We are working together to ensure the resources we are receiving are utilized to achieve the socio-economic wellbeing of the citizens as far as the blue economy is concerned," Dr. Otuoma said. The governor noted that the sector is focusing on two major initiatives to be implemented with support from development partners such as, the Kenya Marine Fisheries and Socio-Economic Development

Busia Governor, Paul Otuoma, addressing the media during the consultative meeting between the Blue Economy Committee of the Council of Governors and Development Partners in the sector held at Voyager Beach Resort, Mombasa. PHOTO: HANIEL EYOB

(KEMFSED) Project and Aquaculture Business Development Programme (ABDP).

KEMFSED is a Government of Kenya and World Bank-funded project whose objective is to improve the management of priority fisheries and marine culture and increase access to complementary livelihood activities in coastal com-

munities. This development target is intended at tapping on massive resources in the Blue Space and contributing to the development of the sector.

Cabinet Secretary for Mining, Blue Economy and Maritime Affairs, Salim Mvurya, pledged to officially launch cooling storage containers for the BMUs

along the coastal counties.

"We have programmes in aquaculture that integrate research and implementation; Kabonyo Kanyagual will be implemented by the Government of Kenya in collaboration with the Government of Hungary which will provide 7 million fingerlings to the counties participating in aquaculture activities," said Mvurya.

The CS said marine fisheries can create at least 60,000 direct jobs and 180,000 indirect jobs in the next five years. In order to achieve this, more investments in fishing, value addition and marine culture is required, he said.

The chairman of the Blue Economy Committee at the CoG, who is also the Lamu County governor Issa Timamy promised that they shall eradicate the stereotypical culture of fishermen living a hand to mouth life and make their lives better.

THE NATIONAL TREASURY AND ECONOMIC PLANNING

INVITATION TO TENDER

Nakuru County, tech firm in deal to turn Giotto trash into revenue earner

BY ANNE MWALE (KNA)

Nakuru County will soon revolutionise its waste management system if the Government approves Giotto Dumpsite—a planned waste-to-energy plant that will transform the gargantuan eyesore.

For 50 years, the Giotto dumpsite has been the only landfill in Nakuru and as the town population increases, the site, which has become part of the urban landscape, sprawling over 30-acres will assist manage the city's waste.

The plant, whose construction is due to begin once a proposal submitted to the Government through the Ministry of Energy is approved will incinerate 3,000 tons of waste every day—roughly 60 per cent of the city's garbage, while supplying Nakuru with 15 per cent of its household electricity needs and meeting international standards on air emissions.

According to an official report by the National Environmental Complaints Committee, an average of

Giotto dump site in Nakuru.

45 per cent of waste goes uncollected in Nakuru.

The report states that Nakuru City generates an estimated 6,000 tonnes of waste daily. However, only 3,962 tonnes are collected while over 2,000 tonnes remain uncollected.

It also states that 85 per cent of waste generated in urban centres in Nakuru is domestic.

According to County Environment, Energy, Natural Resources and Climate

Change Chief Officer Kennedy Barasa, the devolved unit's administration will make available the land within or around Giotto dumpsite, while KEW Technology, a United Kingdom-based sustainable energy solutions company will fi-

6,000
Tonnes of waste that Nakuru generates daily

nance, develop, and operate the power plant.

"KEW Technology did a study back in 2016 with support from the UK-AID on waste analysis in Nakuru County which led to the discovery that the amount of waste generated has high value content which could generate valuable landfill gases and steam.

"With the sustained increase in waste production in Nakuru, the firm seeks to establish material treat-

ment centres that will not only promote the production of clean energy but also boost our county's economy as waste is a public hazard," the Chief Officer noted.

Mr Barasa indicated that over the years, KEW Technology has developed a unique technology that tackles climate change by efficiently converting all types of non-recyclable resources and low-grade biomass into a wide range of sustainable energy vectors such as hydrogen, power, heat and advanced fuels for a zero-carbon future.

"Our partnership with KEW Technology is just one component of Nakuru County's broader strategy to address pollution and embrace renewable energy across all sectors of the economy. We hope that this will serve as a model for other counties in the region," he added.

The implementation of the project is however subject to the approval of a feasibility study which will take at least six months to prepare.

The study will set out both the viability and cost of the project, among other issues.

In the waste-to-energy incineration plants, rubbish is burned in a combustion chamber. The resulting heat is used to boil water until it

turns to steam, which drives a turbine generator that produces electricity.

In cities where land is in short supply, "waste-to-energy" incineration is a quadruple win: it saves precious space, generates electricity, prevents the release of toxic chemicals into groundwater, and reduces the release of methane—a potent greenhouse gas generated in landfills into the atmosphere.

Incinerating waste to generate energy is popular in Europe, where nearly one quarter of all municipal solid garbage is used for "waste-to-energy" purposes. France alone boasts of 126 waste-to-energy plants, while Germany has 121 and Italy 40.

Mr Barasa indicated that once the "waste-to-energy" power plant is complete, it will operate within the strict emission limits of the European Union and that it will adopt a modern back-end flue gas treatment technology to drastically reduce the release of heavy metals and dioxins produced from the burning.

The plant is expected to sustainably solve Nakuru's garbage problem and at the same time create a new income stream for the County Government.

THE NATIONAL TREASURY AND ECONOMIC PLANNING

PUBLIC NOTICE

REQUEST FOR COMMENTS ON THE DRAFT GREEN FISCAL INCENTIVES POLICY FRAMEWORK

The Government of Kenya formed a multidisciplinary taskforce to develop the Green Fiscal Incentives Policy. The policy seeks to identify and prioritize the implementation of a coherent suite of green fiscal reforms that will allow the country to exploit the opportunities of continuing a low-emission development path while enhancing climate resilience and environmental sustainability.

The National Treasury and Economic Planning is spearheading the process on behalf of the Government of Kenya.

As part of engaging the public and stakeholders on this important endeavor, we have posted the draft policy onto the National Treasury website (www.treasury.go.ke) for purpose of receiving comments.

The comments should be forwarded in writing to the undersigned and a soft copy sent to the email [climatefinance@treasury.go.ke] by Tuesday 2nd March, 2023 to enable further revisions.

VACANCY ANNOUNCEMENT

The Kenya Bureau of Standards (KEBS) is a statutory organization of the Government of Kenya established by the Standards Act, Cap 496 of the Laws of Kenya in July 1974. The mandate of KEBS is to provide Standardization, Metrology and Conformity Assessment services through Promotion of standardization in commerce and industry, Provision of testing and calibration facilities, Control of the use of standardization marks, undertaking educational work in standardization, Facilitation of the implementation and practical application of standards, Maintenance and dissemination of the International System of Units (SI) of measurements.

KEBS seeks innovative and result oriented individuals to fill the following vacancies:

- | | |
|--|--|
| 1. Principal Office Administrator (1 Post) | 10. Market Surveillance Officers (23 Posts) |
| 2. Legal Officer (1 Post) | 11. Laboratory Analysts (14 Posts) |
| 3. Supply Chain Officers (4 Posts) | 12. Standards Officers (10 Posts) |
| 4. Accountants (2 Posts) | 13. Metrology Officers (2 Posts) |
| 5. Internal Auditors (2 Posts) | 14. Certification Officers (3 Posts) |
| 6. Security Officers (2 Posts) | 15. Assistant Technicians, Testing Laboratory (10 Posts) |
| 7. Administration Officer (1 Post) | 16. Assistant Technicians, Metrology (2 Posts) |
| 8. Quality Assurance Officers (14 Posts) | 17. Assistant Customer Care Officers (3 Posts) |
| 9. Inspection Officers (14 Posts) | |

APPLICATION SUBMISSION

Please visit the careers page on KEBS website: [https://www.kebs.org](http://www.kebs.org) for detailed job profile/description and instruction on how to apply.

Interested and qualified candidates applications should be submitted either SOFTCOPY to recruitment@kebs.org or HARDCOPY sent by post or hand delivered to KEBS HQ office addressed to the address below, indicating VACANCY NAME on the envelope on or before 15th February, 2023 at 17:00 HRS, EAT enclosing/attach Cover letter, a detailed CV with full details on education background, professional qualifications and relevant experience together with copies of Testimonials, Academic Certificates and National Identification Card.

The Managing Director, Kenya Bureau of Standards
Popo Road, Off Mombasa Road,
P.O. Box 54974 - 00200 NAIROBI.

IMPORTANT NOTICE

- i. KEBS DOES NOT charge any fee in the recruitment process.
- ii. Persons with disability and female candidates are encouraged to apply.
- iii. Academic Qualifications of external origin MUST be accompanied with a recognition and equivalence certificate from the relevant body in Kenya.
- iv. Only shortlisted candidates will be contacted. Canvassing will lead to automatic disqualification.
- v. All degree applicants for engineering related qualifications must be registered as Graduate Engineers.
- vi. The applicants must comply with Chapter Six (6) of the Constitution of Kenya.

PROCUREMENT ANNOUNCEMENT

Consultancy Services Closing Date: Wednesday, 1st March, 2023
1100Hrs East African Time

Country:	Kenya
Ref - No:	KfW 27854
Prequalification	
Subject:	National Open Tender for:
	EAC KENYA – SOUTH SUDAN LINK ROAD (KITALE – MORPUS) PROJECT NATIONAL WITNESS NGO (CONSULTANT) FOR THE ASSIGNMENT OF UPGRADING OF KITALE-MORPUS ROAD (A1) (±75KM)
Tender No:	KeNHA/2656/2023
Project Executing Agency:	Kenya National Highways Authority (KeNHA) Kenya

- The Government of the Republic of Kenya (GoK) has received financing from the German Development Bank (KfW) and the European Union Africa Infrastructure Trust Fund (EU-ITF) [BMZ No.s : 2020 83 939 - Loan Funds & 2020 62 065 - Grant funds] towards the cost of the Upgrading of Kitale-Morus Road (A1) (±75km). The financing and loan agreements are in place.
- The upgrading of the Kitale-Morus Road (A1) section of the Isebania – Kisumu – Kitale – Lodwar – Nadapal/Nakodok Corridor will improve transport of import/export goods and passenger traffic along the highway by decongesting traffic. The project will also improve the level of service and reduce travel times, improve road safety and increase accessibility to Kisumu, Lodwar and Nakodok (**NB South Sudan**).
- The services will involve providing independent verification and compliance tracking and will support the implementation of environmental and social safeguards requirements and -plans for the road rehabilitation project; verifying and tracking whether the commitments and goals of the Project's social safeguard instruments are implemented and achieved diligently, namely to avoid and if avoidance is not possible to minimize and mitigate negative impacts of the project on local communities to acceptable levels; enhancing smooth implementation of the project information sharing, sensitization/risk awareness (**i.e. GBV**) and capacity building of project affected communities, especially vulnerable groups and hereby contribute to overall social sustainability of the project interventions and actively supporting the safeguarding local communities' rights and their entitlements.
- The Kenya National Highways Authority, KeNHA, being an authorized agent of the Government of the Republic of Kenya now invites eligible consultancy services companies to submit their prequalification applications in order to be considered for the execution of these Services.
- Applicants are required to complete the Prequalification Document and demonstrate that they are qualified to perform the services (**financial capabilities, description of similar assignments, experience in similar conditions, availability of appropriate skills among staff, etc.**). To be considered for prequalification, Applicants must demonstrate that they have achieved a minimum annual construction turnover of KSH 25 million for the last five (5) years. A firm may apply for prequalification both individually, and as part of a JV to enhance their qualifications.
- This prequalification for the Witness NGO will be guided by the latest version of the "Guidelines for the Procurement of Consulting Services, Works, Plant, Goods and Non-Consulting Services in Financial Cooperation with Partner Countries" (**refer to homepage of KfW Development Bank, www.kfw-entwicklungsbank.de**).
- The Executing Agency is under no obligation to shortlist any firm or Joint Venture who submits a prequalification application. Should the Tender be cancelled, tenderers are not entitled to any compensation, nor will any reasons be given for the cancellation.
- The Prequalification Document is available free of charge from the KeNHA website www.kenha.co.ke.

Applicants may obtain further information at the address and e-mails given below during office hours (**weekdays from 8h00 to 17h00 EAT, excluding public holidays**):

Director Development,
Kenya National Highways Authority
Barabara Plaza, Block A & C, Off Airport South Rd, along Mazao Rd (Opposite KCAA HQ)
P.O. Box 49712 - 00100, Nairobi, Kenya

Quality Highways, Better Connections

Specific Procurement Notice Request for Bids Works (Without Prequalification)

Employer:	KENYA NATIONAL HIGHWAYS AUTHORITY (KeNHA)
Project:	MOMBASA SPECIAL ECONOMIC ZONE DEVELOPMENT PROJECT (MSEZ)
Contract Name:	ACCESS ROAD TO MOMBASA SPECIAL ECONOMIC ZONE DEVELOPMENT PROJECT ROAD
Country:	KENYA
Loan Agreement No.:	KE-P35
Tender No.	KeNHA/2663/2023

- The Government of the Republic of Kenya has received co-financing from the Government of Japan through Japan International Cooperation Agency (JICA) toward the cost of the Mombasa Special Economic Zone (MSEZ) and intends to apply part of the proceeds towards payments under the contract: Access Road to Mombasa Special Economic Zone Development Project.
- Kenya National Highways Authority, a State Corporation under the Ministry of Roads and Transport in the State Department for Roads, established under the Kenya Roads Act 2007, now invites sealed bids from eligible bidders for the contract for construction of Access Road to Mombasa Special Economic Zone.

The scope of works includes, but is not limited to, the following activities, to be executed within a period of 28 months:

Access Road to Mombasa Special Economic Zone Development Project (4.6 Km)

The scope of works is as described but not limited to;

- A. Setting out and construction control
- B. Improvement and maintenance of the temporary road and passage of traffic through the works.
- C. General Construction Work of Port Access Road:
 - i. Site Clearance of working area within the road reserve
 - ii. Topsoil stripping
 - iii. Scarification and compaction of subgrade
 - iv. Earthworks; comprising high embankment construction and deep excavations
 - v. Embankment protection works and provision of longitudinal drainage ditches (lined and unlined)
 - vi. Provision of new box and pipe culverts, with appropriate inlet and outlet features and scour protection works
 - vii. Construction of a dual carriageway comprising:
 - Two 3.5m wide lanes carriageway on each direction
 - 4m wide Central median
 - 2.0m wide outer shoulder on each side of the carriageway
 - 0.5m wide Inner shoulder on each side of the carriageway
 - 2.5m Raised Footpath on each side of the Carriageway
 - 5.5m wide Utility Service Lane
 - viii. Road pavement layers comprising:
 - A variable thickness of up to 600mm natural material – improved subgrade
 - 250mm Graded Crushed Stone (0/40 – Subbase quality) for lower Subbase
 - 250mm Graded Crushed Stone (0/30 – Base quality) for upper Subbase
 - 175mm Dense Bitumen Macadam – Base
 - 50mm Asphalt Concrete – Surfacing on the carriage way and shoulders
 - ix. Construction of four new interchange loops to form a half-clover interchange with the Mombasa Southern Bypass.
 - x. Widening of Road Pavement at some sections to accommodate truck parking's.
 - xi. Provision and erection of road furniture and road markings, and other miscellaneous works.
 - xii. Installation of street lighting scheme for the entire length.

The Defects Notification Period will be 12 months.

- Bidding will be conducted through procedures in accordance with the applicable Guidelines for Procurement under Japanese ODA Loans, and is open to all Bidders from eligible source countries, as defined in the Bidding Document.

- Interested Bidders may obtain further information from and inspect the Bidding Document during office hours (Mondays- Fridays from 08:00 to 17:00 hours local time) excluding public holidays at;

- The Bidding document in English may be downloaded free of charge from: Website: www.kenha.co.ke.

- Bids must be delivered to the address below on or before **1100 hours local time on Wednesday, 31st May, 2023**. Electronic Bidding will not be permitted. Late Bids will be rejected. Bids will be publicly opened in the presence of the Bidders' designated representatives and anyone who chooses to attend at the address below:

Kenya National Highways Authority
Attention: Deputy Director, Supply Chain Management
Barabara Plaza, Block C, 2nd Floor, North Wing, Tender Box,
Jomo Kenyatta International Airport (JKIA) off Airport South Road,
Along Mazao Road, Nairobi.

- All Bids must be accompanied by a Bid Security (in the form prescribed in the bidding documents) of **USD 900,000.00**
- All interested bidders are required to continually check the Kenya National Highways Authority website: www.kenha.co.ke for any tender addenda or clarifications that may arise before the submission date.

Deputy Director - Supply Chain Management
FOR: DIRECTOR GENERAL

PS calls on technical institutions to implement competency-based education and training

BY DICKSON MWITI (KNA)

Technical, Vocational Education Training (TVET) PS Dr Esther Thaara Muoria has urged technical training institutions to implement more Competence-based Education and Training (CBE) programmes and work closely

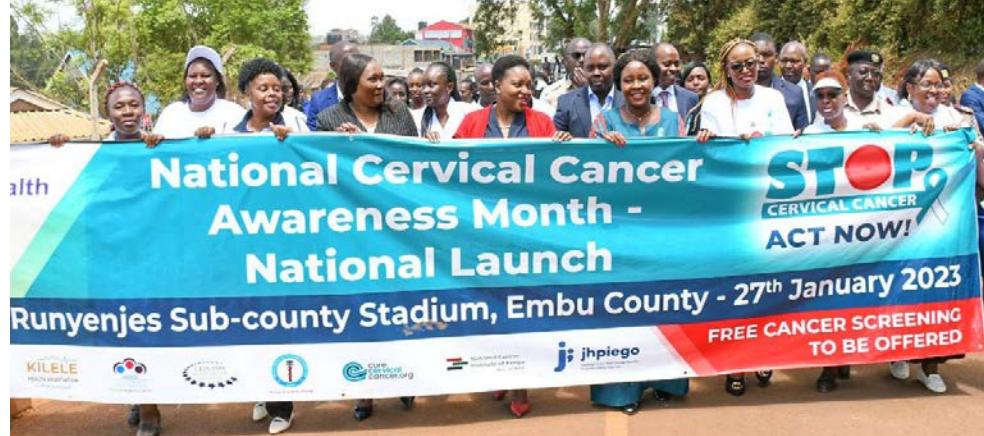

with the relevant industries to offer real solutions to the industry and society.

Speaking on behalf of the PS during Mitunguu Technical Training Institute's inaugural graduation ceremony, Acting Director for Technical Education Mr Joseph Njau said the future of Ken-

ya's development agenda was on technical skills, urging more young people need to be part of the training.

Dr Muoria added that technical skills and innovations are critical to the future of Kenya in achieving Vision 2030 and the Sustainable Development Goals.

Cancer ranks second in Non-Communicable Diseases table in Kenya

Health CS Susan Nakhumicha (center) and Embu Governor Cecily Mbarire (on her right) in a procession during the launch of National Cervical Cancer Awareness Month in Embu.

BY SAMUEL WAITITU (KNA)

Cancer still remains the second leading Non-Communicable Disease (NCD) in Kenya after cardiovascular diseases with 42, 000 new cases recorded every year as per World Health Organization (WHO) statistics.

Health Cabinet Secretary Susan Nakhumicha said 27, 000 cancer related deaths are also recorded every year with leading cancers being breast, cervical, prostate, esophageal and colorectal.

She said most of these cancers can be prevented through screening and early diagnosis which was not the case as the majority of patients seek medical attention in late stages when it is difficult and expensive to treat.

Speaking during the launch of National Cervical Cancer Awareness Month in Runyenjes Stadium in Embu, the CS said the narrative could be changed if all Kenyans adopted good health-seeking behaviour including going for regular medical checkups.

She noted that the government had acquired all the necessary tools to fight the disease with cervical

cancer being the first one marked for elimination.

The CS noted that Human Papillomavirus (HPV) was the main cause of cervical cancer with its infection causing up to 99 percent of all cervical cancer cases.

She, however, said there was a ray of hope in preventing the spread of cervical cancer as it takes 10-15 years for the changes in the cervix caused by HPV to develop into cancer.

"This gives us an opportunity to screen and treat to prevent the disease," she said, noting that the vaccine targeting HPV infections was available that was safe and effective.

She said the vaccine was available free of charge in all facilities providing routine immunization for children across the country.

"We are working towards vaccination of 90 percent of girls from the ages of 10-14 years, screening of 70 percent women between 35-49 years and providing treatment and care for 90 percent of women identified with cervical cancer," the CS said.

In collaboration with Clinton Health Access Initi-

ative, She said that the Ministry has distributed over 800 thermal ablations for treatment of pre-cervical cancerous lesions to health facilities across the country.

CS Nakhumicha also said for the first time the Ministry had introduced HPV-DNA testing in 27 county referral hospitals which was the recommended standard method for cervical screening.

She said the government will continue empowering Community Health Workers (CHWs) on cancer using the training materials developed to educate communities and mobilize them for screening and HPV vaccination.

The CS reported that as the government seeks to transform NHIF to a social insurance, it will look into the packages so that screening, diagnosis and treatment for cervical cancer was well covered for all Kenyans.

Embu Governor Cecily Mbarire said since the launch awareness month early this month, they had managed to screen only 1, 797 women which she said was a small number compared to the population of women in the county.

"The Government has invested heavily in modernizing and expanding Technical and Vocational Institutions to increase access, equity and quality TVET training. This has come with the realization and appreciation of the contribution of the service industry in fostering social economic growth," said Dr Muoria.

The PS said the government has so far committed huge resources to improving infrastructural development, equipping institutions and capacity building of the

trainers.

This, she added, is aimed at improving access, relevance, quality, and equity of the TVET programmes, and further lauded the institution's Management led by the board chairman Mr Kenneth Gitonga for efforts made towards building the requisite human capital and knowledge base to drive the development agenda.

"It is gratifying to note that Mitunguu Technical Training Institute, which has today released 937 graduands to the job market, offers diverse aca-

demic programmes which give students a wide choice. I also note with satisfaction that the institute is a centre of excellence in ICT," she said.

The institute's Principal Ms Lucy Mukiri said their aim was to continue producing a competent and versatile human resource that meets ever-changing market needs.

"To support government initiatives, the Institute offers hands-on skills training that will spearhead industrial growth and eradicate poverty through wealth creation," she said.

"Kenya will not use its data protection laws to violate the rights of citizens and stifle access to information,"
— President William Ruto

NEW GOLD

Government pushes to protect data as digital economy thrives

Participants follow proceedings at the data protection conference in Nairobi last week.

BY AGENDA KENYA TEAM

You must have logged onto a website and it asks you to accept cookies, and you gladly do so?

Or visited that government agency website at a cybercafé and filled a form online to get the service you dearly need?

Well, every day when getting into an institution or a gated community, you usually leave your Identity Card without thinking much about it.

And did you forward that information about someone that came through WhatsApp to your friends?

This is the reality of our lives today, as we readily leave our personal data at various places be it digitally or in the physical world.

And as data becomes the new currency, concerns over protection and privacy are rising amid low levels of awareness on the risks of giving out such information or the

importance of safeguarding it once collected.

These concerns are not only coming from the private sector but also from ordinary citizens and the government, which has developed laws to enhance data protection and privacy.

“As a country, we are at a critical time where we are generating plenty of data from everything we do and there are many risks if we don’t protect it,” said Ms Immaculate Kassait, the Data Commissioner, at the first data protection conference held in Nairobi last week.

During the two-day event, President William Ruto launched the data protection registration system as the government tightened control on data privacy.

He said at least 1,700 data processors and handlers had been registered and certified by the system and thousands others are expected to be enrolled.

According to Ms Kassait, data protection

and privacy are crucial to the country’s economic growth. Safeguarding data collected, she added, has become an urgency for Kenya, as most transactions move online and the digital economy flourishes.

“We must uphold a good culture on data protection and ensure the ecosystem is secure to boost economic growth,” she said.

The responsibility of data protection, she observed, falls on data processors and controllers, data subjects and the government.

Data subjects are you and me - the people being asked to provide our details to access services, institutions or information.

Data processors and controllers, on the other hand, are the people asking for the information and using it. These are institutions like hospitals, schools, banks and government agencies as well as websites.

Ms Kassait noted that the law provides that all data collectors must have systems that protect

INFOBOX

The Data Protection Act 2019

- This is an Act of Parliament that established the Office of the Data Protection Commissioner (ODPC).
- It makes provision for the regulation of the processing of personal data.
- It provides for the rights of data subjects and obligations of data controllers and processors.
- According to the Act, it is illegal to collect, process or disclose a data subject's information without their permission.

The ODPC has come up with three regulations to enhance its work. These are:

- a) The Data Protection (General) Regulations.
- b) Registration of Data Controllers and Data Processors Regulations.
- c) Complaints Handling and Enforcement Procedures Regulations.

the information collected to avoid breaches. On the other hand, the government's has the overall responsibility in data protection and privacy.

This it has done by coming up with the Data Protection Act 2019, the anchor law that created the Office of the Data Protection Commissioner.

“It is up to the data collectors to ensure all the information is protected from breaches. In the unfortunate event that the data is breached, one will be held accountable,” she said.

Mr Eliud Owalo, the cabinet secretary, Information, Communication and Digital Economy, said that data protection and privacy is at the centre of the government's transformative agenda on digital technology.

The government is currently registering farmers digitally to enable the issuance of subsidised fertiliser and other initiatives.

Similarly, the government has implemented the Hustler Fund and will soon set up an integrated digital health system to boost primary healthcare.

“We have committed to digitise most services and programmes to eliminate bureaucracy and boost efficiency but this cannot succeed if the data people provide is not secure. We must protect peoples rights to privacy as we build the digital economy.”

The ODPC is expected to issue guidelines on how the data collected from farmers and through the health system as well as other government services would be protected.

Mr Owalo said that in the next six months, the government will be offering up to 5,000 services on the e-citizen platform.

“As we shift to digital services, we are also thinking about cyber security and data protection,” he observed.

Further, he said the government will roll out 100,000km of fibre optic network across Kenya. “We are also going to provide 25,000 free WiFi hotspots to ensure more people access internet and establish 1,450 digital hubs in villages to encourage digital youth employment. All these come with data protection consequences,” he said, adding that Kenya is keen on leveraging on technology to realize her goals to be leading digital economy in Africa.

He assured firms and innovators that the government's push to protect data is not meant to stifle innovation.

Eng. Daniel Obam, the communications secretary at the National Communications Secretariat, said that the government's next phase of policy development on data protection is on emerging technologies like artificial intelligence, block chain and creation of digital identity card.

“In terms of policy development, we are working on having a digital unique identifier. This will help to know who has breached data and will curb existence of multiple data IDs online,” he said.

The digital identifier, according to him, will facilitate information sharing so that one doesn't need to have to give details everywhere they go. “With policy development, this should change. We have to have platform that enables cross-usage of data and enables one-time data collection.” ■

The government has committed to digitise most of its services and programmes to eliminate bureaucracy and boost efficiency but this cannot succeed if the data people provide is not secure. We must protect peoples' rights to privacy as we build the digital economy,” – Mr Eliud Owalo, the Cabinet Secretary, Information, Communication and Digital Economy.

BRIEFS

Ministry to set up digital health system

KENYANS WILL SOON enjoy seamless digital health services following a collaboration between the ministries of Health and Information, Communication and Digital Economy.

The digital services will focus on primary health care that include diagnosis and treatment of acute injuries and sickness and diabetes and cancer screenings.

Health CS Nakhumicha Wafula (right) said after a meeting with his ICT counterpart Mr Edward Owalo that the integrated digital health system will ease delivery of health-

Boxing team qualifies for world championships

HIT SQUAD, A TEAM OF Kenyan boxers, has qualified for the World Boxing Championships that will be held in Uzbekistan from May 1 to 14.

The team led by Commissioner Linus Oftware, who is also the Head of Security at Huduma Kenya, qualified for the event after a successful performance at the East and Central Africa Boxing Confederations held in Dar-es-Salaam Tanzania from January 16-21. Boxing has been a good medium in rehabilitating youths, especially from low-income settlements, who engage in the sport to escape various ills.

Some of the youth eventually find employment in the disciplined services like Kenya Defence Forces, National Police Service and Kenya Prisons. ■

AGRICULTURE MARKETING

Strategy promises to put more money in farmers' pockets

Ministry says it will establish and develop aggregation centres with appropriate infrastructure

A 10-year marketing strategy launched by the Ministry of Agriculture last week promises to put more money in farmers' pockets, not only by building new markets and aggregation centres, but also through adoption of digital channels to eliminate brokers. The strategy that will take some Sh8.44 billion to implement notes that many areas designated as markets do not

have required agricultural infrastructure like livestock yards and cold chain facilities.

The ministry will, therefore, seek to develop and maintain market infrastructure and facilities that meet the requirements of various agricultural produce and products such as livestock sale yards and fish landing sites.

It will also establish and develop aggregation centres with appropriate infrastructure and associated facilities for agricultural produce to attain economic volumes.

To enhance compliance to market requirements for agricultural produce and products standards, the ministry says it will develop new guidelines and enhance the capacity

This strategy will help to facilitate efficient trade and focus small farmers away from subsistence to commercial farming,"

— Mr Mithika Linturi, Agriculture CS

of surveillance institutions at national and county levels.

"It is estimated that over 30 per cent of harvested crops, 25 per cent of fish and 40 per cent of dairy products along the value chain are lost due to poor post-harvest management, inappropriate storage facilities, poor produce handling and poor linkages to markets. The ministry will promote post-harvest and preservation technologies to reduce loss of agricultural produce," says the document.

The ministry will also seek to improve the value of agricultural produce to increase market access, deepen adoption of modern and innovative systems for marketing of agricultural produce and products, develop an efficient and reliable transport infrastructure and logistics for movement of agricultural produce and products to markets.

During the launch, Agriculture CS Mithika Linturi noted that agricultural marketing has not been fully developed to ensure it successfully makes contribution to the socio-economic development of the country.

"This strategy will help to facilitate efficient trade and consequently focus small farmers away from subsistence to commercial farming, while increasing the competitiveness of the country's produce and products," he said. ■

HUDUMA CORNER

Institutions partner to better services for the disabled at Huduma Centres

Persons living with disabilities will now find it easier to access services at Huduma Centres following discussions between Huduma Kenya and the Kenya Institute of Special Education (KISE).

Officials from the two institutions met recently and agreed on various interventions that can be put in place to make the centres friendlier to the disabled.

Currently, the centres have ramps and wheelchairs to provide support for the physically challenged.

KISE director, Dr Norman Kiogora, and Huduma Kenya Acting Secretary/CEO, Mr Mugambi Njeru, agreed at the meeting to further the partnership through training of

Huduma Kenya staff on sign language and KISE to facilitate sessions during Huduma Kenya's Customer Service Excellence.

Besides those who are physically challenged, other persons with disabilities targeted by the interventions are those with mental, sensory and intellectual challenges.

Other areas Huduma Kenya and KISE agreed to partner are in deployment of sign language interpreters across the 52 Huduma Centres, translation of Huduma Kenya Programme Service Charter into Braille and Audio Visual, Deployment of Services to Huduma Centres, Contact Centre and Huduma Mashinani and Joint Awareness Campaigns. ■

Climate and weather, what's the difference?

When it rains on a particular day or a week, these changes in atmospheric conditions refer to the weather. On the other hand, climate refers to these weather changes for 30 years or more.

Now, tell me about climate change

This is drastic change in weather conditions of a region — including very high or very low temperatures or decreased rainfall — over time.

Is climate change the same as global warming?

Climate change is one of the effects of global warming, which is a build up of excess heat on the earth due to human activities.

How is climate change a man-made problem?

The rapid change in weather patterns is fuelled by human activities that lead to emission of carbon dioxide and other greenhouse gases (GHG) leading to rise in temperatures. In Kenya, temperatures in some parts of the country, especially arid areas, have risen by over 1.5°C in the past years.

Why is the government keen on combating climate change?

Effects of climate change like drought and floods undermine a country's economic development. Kenya, for instance, has had to divert resources from other areas to fight drought or help victims of floods.

Should I be concerned about climate change?

Yes, the effects of climate change are affecting each of us. For instance, failed rains in the last four seasons have led to higher food prices due to decreased production. Again, you must have been asked to contribute to help save victims of drought.

I have heard about climate mitigation and climate adaptation...

The former means reducing emission of greenhouse gases like carbon dioxide to prevent temperatures from rising further while the latter involves altering the way we do things, for instance, farming or transportation to reduce risks associated with climate change.

How will planting of 15 billion trees help to curb climate change?

Trees absorb carbon dioxide from the atmosphere, therefore, stopping rise in temperatures. They also aid in conserving soil and water and purifying the air.

The govt said it would hire youths to plant some 15 billion trees...

The tree planting project is being implemented by the Ministry of Environment, Climate Change and Forestry, and is expected to create up to 320,000 jobs. The ministry will announce opportunities arising from the exercise. However, you can also plant tree seedlings for sale in your community. But please register your nursery online with Kenya Forest Service for networking, ease of doing business and market linkages.

Where can I get tree seedlings to plant?

Kenya Prisons Service and Kenya Forest Service are some of government institutions that sell a variety of tree seedlings to the public at subsidised rates.

They acknowledged that Kenya and France enjoy warm and cordial historical relations that continue to grow steadily. PHOTO: PCS

KALRO develops high yielding rice varieties to boost local production

BY SADIK HASSAN (KNA)

The Kenya Agricultural and Livestock Research Organization (KALRO) is conducting trials for new climate-smart high-yielding rice varieties after years of research in a bid to bolster food production in the country.

The KALRO rice programme contributes to the National Rice Development Strategy (NRDS 2019-2030) of enhancing food security and income through sustainable rice production.

KALRO Director General Dr Eliud Kireger says the research Agency has released a total of nine improved rice varieties for both upland and lowland agro-ecologies. Three of the varieties are Komboka, CSR36, and 08FAN10 dubbed Mkombozi by farmers because it is early maturing.

The CSR36 rice variety which is long slender grain, non-sticky rice that separates on cooking has passed the national performance trials and is now under distinctiveness, uniformity and stability test. It was recently displayed to Tana River farmers.

The CSR36 variety is climate-

CSR36 rice variety at the demonstration farm at the Tana Irrigation Scheme during a rice stakeholder's field day.

smart and high yielding in that it, can be grown in saline-sodic soils (soils with pH levels more than 8.5). "The grains have long slender and aromatic attributes that match the consumer preference for milled white rice in Kenya.

Wide adoption of CSR36 offers an opportunity to utilize the salt affected areas for rice production and to significantly increase rice production and set the country free from the ballooning rice imports," said

Dr. Kireger in his speech read by the Director at the Industrial Crop Development Institute Mr. Finyang Pole.

Rice is one of the major food crops after maize, and the consumption of rice has been increasing "because young people nowadays prefer rice and potatoes. With that high demand, there is a need to ensure we produce a lot of rice to feed our people," Finyang said at the Tana Irrigation Scheme.

The country's rice deficit of

around 100,000 metric tonnes is filled through importation, making the country lose in foreign exchange.

The only solution, Finyang said, is to come up with our own homegrown solutions by making sure we increase both production and productivity-production by increasing the area under rice farming in the country, and productivity by coming with the superior variety that is also climate smart.

KALRO has changed its strategy of rolling out new varieties by working backward with farmers to know the variety they want and that suits market needs.

Trials are ongoing in all rice-producing irrigation schemes in the country to come up with a variety that is high yielding. Hence farmers will have a basket full of options and management practices to increase food production.

"Two varieties have been released and others are in the pipeline, all of them with different traits like salt tolerance. If a variety is not salt tolerant, it will not perform," Mr Pole said.

BRIEFS

Lobbies unveil anti cervical cancer campaign in Kisumu

The Africa Cancer Foundation, in collaboration with the Matibabu Foundation and the Lake Region Economic Bloc (LREB), has launched a cervical cancer campaign in Kisumu County to create awareness and lower the prevalence rate of the killer disease in the area. The campaign, spearheaded by Kisumu Governor Prof. Anyang Nyong'o's spouse Dorothy Nyong'o, targets at scaling up cervical cancer screening in a long-term effort to eliminate the disease in the area by 2030. Dorothy Nyong'o, who is also the patron of the Africa Cancer Foundation, said the disease, which is preventable and treatable when detected early, continues to ravage families in the area.

She attributed this to the high prevalence of HIV/AIDS in the area saying the two diseases are interrelated. "Cervical cancer is mostly sexually transmitted. We should not be shy but talk openly about this as we encourage our women to go for screening," she said. Speaking during the launch of the campaign at Jaramogi Oginga Odinga Teaching and Referral Hospital in Kisumu, Nyong'o who was accompanied by her counterparts

Margaret Lusaka (Bungoma), Emily Nyaribo (Nyamira) and Agnes Ochillo (Migori) said the campaign shall be scaled up to cover the LREB which comprises 14 counties.

The campaign, which is the first of its kind in the region, coincides with the global and Kenya National Cancer Awareness month which is marked in January. Through the initiative, free screening services will be offered while medical personnel will benefit from 25,000 pairs of medical scrubs courtesy of Matibabu Foundation and Africa Cancer Foundation. Nyong'o said the medical personnel will be engaged as ambassadors of the campaign so as to scale up screening and treatment.

As a preventive measure, Nyong'o called for intensive administration of the Human Papilloma Virus (HPV) vaccine to girls aged 10-14 years to lower the prevalence of the disease. Kisumu County Executive Committee Member in charge of Medical Services Dr. Gregory Ganda decried the poor uptake of the HPV vaccine, which he said was critical in the fight against the disease. By Jimmy Agoi and Adoyo Immaculate

Gov to tip TVET managers on income generation strategies

Kenya School of Technical and Vocational Education and Training (TVET) has embarked on training managers of technical institutions from across the country on income generating strategies to enhance effective and efficient management of human and financial resources in the institutions. The training has been facilitated by the African Development Bank (AfDB) through the Ministry of Education' State Department for TVET for relevant skills development. The Ministry of Education has contracted the Kenya School of TVET to carry out training of managers on public finance management and governance to improve governance capacity at the institutions, efficacy and professionalism in line with governance policies, frameworks and structures of TVET Act of 2013 and sessional paper No. 14 of 2012. Speaking to the KNA during the official launch of the training at the Rift Valley Technical Training Institute (RVTTI) and the Eldoret National Polytechnic, State Department for Technical, Vocational and Training Principal Secretary (PS) Dr. Esther Muoria pointed out that the project which started in June last year targets 3,115 TVET managers across the country and has so far trained about 2,000 administrators. By Judy Too.

US based charity in talks with Murang'a County to revamp coffee and ICT sectors

BY BERNARD MUNYAO
(KNA)

A United States based organization has initiated talks with Murang'a County Government to revamp the coffee and ICT sectors in the county.

The MLife Foundation has reached out to the County Assembly and the executive to partner and engage young people in production and marketing of coffee through online platforms.

Mr. Mwangi Mukami, the Head of the Foundation said the use of digital technology can boost coffee farming by accessing international markets through online marketing.

He said this when he led a delegation to meet the County Deputy Governor Stephen Munania and the

Murang'a Deputy Governor Stephen Munania having a consultative meeting with delegation from a US based foundation in his office. PHOTO: BERNARD MUNYAO (KNA)

leadership of the Murang'a County Assembly.

Mwangi said through a partnership with the devolved administration, young people will be brought on board to search for locally produced coffee markets using digital platforms.

He lauded the high qual-

ity of Kenyan coffee saying it can fetch good returns in the American market.

"Kenya is among countries which produce high quality coffee. What is missing and affecting farmers are good returns. By searching for markets online, the produce can fetch better prices.

"Mlife Foundation with the Murang'a County Government wants to establish ICT hubs in different parts of the county. The hubs will help train young people on emerging developments in the digital world and how they can explore online to access a wide market for local produce," explained Mwangi at the office of the Deputy Governor.

Munania on his part, commended the delegation for their concern over the local youth saying the county government has established coffee demonstration farms across the sub counties targeting the youth.

"The County Government has two acres of land for coffee farming demonstration at Ikundu Farm and another two acres at Iyego Society," the Deputy Governor said.
